

Adapter sleeves for metric shafts OH 3188 H (OH 3188 H, ID 410 mm, OD 560 mm, W 307 mm)

Adapter sleeves are the most commonly used components for locating bearings with a tapered bore onto a cylindrical seat as they can be used on plain or stepped shafts. They are easy to install and require no additional location on the shaft. When adapter sleeves are used on plain shafts, the bearing can be located at any position on the shaft. When used on stepped shafts together with an L-shaped spacer ring, bearings can be accurately positioned axially thereby facilitating bearing mounting and dismounting.

SNS Part Number	31163218SKF0200
Type of Product	Adapter Sleeve for Metric Shaft
Brand	SKF
Model No	OH 3188 H
Inside Diameter (mm)	410
Outside Diameter (mm)	560
Width (mm)	307
Product Catalog	Consult from customer
