

# Spherical roller bearings 23180 CA/W33 SKF

SKF 23180 CA/W33 \* Bearings Company information

SKF 23180 CA/W33 \* bearings are widely used in industrial drive, agriculture, compressors, motors and generators, construction, industrial fan, industrial transmission and other fields. SKF 23180 CA/W33 \* bearings can ensure high quality for more than 80% raw material of SKF 23180 CA/W33 \* bearings provided by the steel plant. Explorer series bearing of SKF 23180 CA/W33 \* bearings are better than any brand bearings currently in bearing performance , lifetime, design, and the use of performance. Explorer series bearings of SKF 23180 CA/W33 \* bearings have more advantages ,such as higher meet rated , lower noise, reducing warranty costs greatly, increasing running time of the machine .

## SKF 23180 CA/W33 \* Bearings Product Details

| Product information  |     |     | Spherical roller bearings, cylindrical and tapered bore |        |            |                 | Tolerances, s |  |
|----------------------|-----|-----|---|--------|------------|-----------------|---------------|--|
| Principal dimensions |     |     | Basic load ratings                                      |        | Fatigue    | Speed ratings   |               |  |
| d                    | D   | B   | dynamic   | static | load limit | Reference speed | Pu            |  |
|                      | mm  |     | kN  |        | kN         | r/min           |               |  |
| 400                  | 650 | 200 | 4650  | 7650   | 530        | 530             | 950           |  |
