

SKF SELF-ALIGNING ROLLER BEARINGS 23964CC/W33

SKF Self-aligning roller bearings 23964CC/W33 Agent

SKF **self-aligning roller bearings** also be called **spherical roller bearings**,this kind of roller bearings are designed to support very heavy radial load and both radial and axial load. **SKF bearings** corporation is a leading self-aligning roller bearings manufacturer, the present SKF range of spherical roller bearings includes a wide range of sizes of several ISO Dimension Series and also includes special designs, for example, for vibrating screens and similar applications. More recently a range of sealed spherical roller bearings has been added to the assortment. Split spherical roller bearings are usually based on the standard bearings but can be customized as required.

The part number **23964CC/W3** as a typical SKF **self-aligning roller bearings**,are widely used in the fields of railway, steel production,paper industry,cement industry,mining,mechanical production,etc.The technical data of 23964CC/W3 is as follows:

Dimension: 320mm x440mm x 90mm

Mass: 42.0 Kg

Basic dynamic load: 1430 KN

Basic static load: 2700 KN

Reference speed: 1400 r/min

Limiting speed: 1500 r/min

Matched **FAG bearings**: 23964MB

Matched **NSK bearings**: 23964/23964K

Matched **NTN bearings**: 23964/23964K

Matched **TIMKEN bearings**: H239649D/H239610

As a leading **SKF bearings** distributor, BESTN bearings supplies has been in this field for many years,

we can provide a full range of SKF **self-aligning roller bearings**. Welcome to contact us for more info.
